## AWS Training Programs at a Glance

### AWS Essentials Training

- AWS Cloud Practitioner Essentials (CP-ESS)
- AWS Technical Essentials (AWSE)
- AWS Business Essentials (AWSBE)
- AWS Security Essentials (SEC-ESS)

### AWS System Architecture Training

- Architecting on AWS (AWSA)
- Advanced Architecting on AWS (AWSAA)
- Architecting on AWS - Accelerator (ARCH-AX)

### AWS Development Training

- Developing on AWS (AWSD)
- DevOps Engineering on AWS (AWSDEVOPS)
- Advanced Developing on AWS (ADV-DEV)

### AWS Operations Training

- Systems Operations on AWS (AWSSYS)
- DevOps Engineering on AWS (AWSDEVOPS)

### AWS Specialization

- Security Engineering on AWS (AWSSO)
- Big Data on AWS (BDAWS)
- Migrating to AWS (AWSM)
- Data Warehousing on AWS (DWAWS)
- Practical Data Science with Amazon SageMaker (PDSASM)
- Machine Learning Pipeline on AWS (ML-PIPE)
- Running Containers on Amazon Elastic Kubernetes Service (RCAEKS)
- Planning & Designing Databases on AWS (PD-DB)

### AWS Exam Readiness Workshops

- Exam Readiness Workshops for all AWS Certifications

# AWS Talent Program

Are you looking for AWS experts for your company? With the AWS Talent Program, we offer you a tailored complete solution.

We search and recruit suitable talents for you and train them to become highly qualified and certified specialists within just a few months.

The program identifies, evaluates, educates, coaches, mentors, certifies, and if needed replaces a candidate. This ensures your investment yields precisely the certified, highly qualified cloud experts you are seeking.

## Your Benefits

- **Qualified and certified cloud experts** for your company - after many years of experience, we can assess very precisely whether a talent can develop into the professional you are looking for within a short period of time. After just a few months, your well-trained new employees can be deployed directly in customer projects.
- You gain **loyal employees** because you have invested extensively in their training and certification.
- Compared to booking individual services (recruitment, multi-month training program, certifications), you achieve significant **cost savings** with the talent program. Recruitment fees are eliminated.
- You **significantly reduce the time** you spend on recruiting new talent.
- You receive a **guarantee of success** if candidates complete the entire program and have been evaluated by Fast Lane before the program begins.

## Program Overview

Recruitment and preparation of candidates is followed by an evaluation class. After successful completion, a candidate has qualified for participation in our talent programs and you can conclude a corresponding employment contract with him or her. We then prepare the candidates optimally for their future fields of work in several training blocks in the training paths of your choice. All program participants prove the acquired knowledge through certifications.

## Full Service Package

- ✓ **Program management**
- ✓ **Talent** identification and **screening**
- ✓ Evaluation and **matchmaking** with future employer
- ✓ **Contractual recommendations** and support
- ✓ HR support and technical **coaching**
- ✓ **Premium education program**
- ✓ Various **AWS certifications** up to professional level
- ✓ **Fast Lane guarantee:** If a candidate turns out not to be suitable, we will find and train a replacement at no additional cost.

# AWS Consulting Services

aws partner network
Advanced
Consulting
Partner

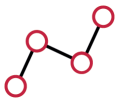
There is no standardized approach to cloud projects. Every customer situation is different and needs precise evaluation and planning in order to benefit from the cloud in the best possible way.

As an authorized AWS Consulting Partner, we support customers of all sizes to analyze the concrete benefits of Amazon Web Services for their environments and to design, architect, build, migrate and manage their workloads and applications on AWS. We work closely with our customers and take into account individual business strategies, as well as organizational and operational aspects.

## Cloud Migration

Companies that choose a cloud solution need to evaluate all opportunities and analyze a wide range of challenges for a robust migration strategy. We support you in all phases of your migration process.

## Cloud Optimization and Development



Cloud solutions require continuous monitoring, analysis and customization to ensure that you don't waste resources and that the resources you invest in will advance your business. After a cloud migration, we can help you identify additional optimizations and improve your processes that are already running on AWS. We analyze your services and pricing options to ensure that you only pay for what you really need.

## Developing and Optimizing Cloud Applications

Companies often use a broad portfolio of applications developed and maintained on different platforms. These existing applications are increasingly being enhanced and adapted to the cloud environment or replaced by new, cloud-native applications. Our experts can help you design, develop, and continually improve your cloud applications.

## Cloud Security and Compliance Services

Many advantages of cloud-based solutions become challenges when it comes to security. Benefits such as openness, decentralization or agility represent a fundamental change in the way services are delivered to users. In a cloud environment, most of the resources are provided externally, resulting in different risk factors for access to data and systems. In order to cover the entire spectrum of security and data protection issues, a comprehensive understanding of all security aspects is required. We help you assess your cloud-based risks, identify security vulnerabilities and specific security needs, set priorities and ensure the security of your cloud-based solutions.

## AWS Well-Architected Framework

The AWS Well-Architected Framework includes strategies to help you compare your workload against best practices and includes a guide to developing secure, high-performance, efficient and fail-safe infrastructures for your applications. Based on the best practices of the Well-Architected Framework, we support you in the design of stable and efficient systems in the cloud and show you the advantages and disadvantages of decisions you have to make when developing systems on AWS. You can focus on the functional requirements.

# About Fast Lane

The Fast Lane Group operates globally, across 60+ countries, in the delivery of technology, business and sales training. We also provide a comprehensive consultancy service in Cloud, Cybersecurity, Digital Transformation and Mobility. Fast Lane is an authorized training partner of Aruba, AWS, Google, Microsoft, NetApp, VMware and other leading vendors. As a result can boast a large pool of Subject Matter Experts to assist with helping organizations to achieve their digital transformational goals, whatever they might be. Fast Lane also offer their own training programs around the latest technology trends.

We run training programs and workshops online in the virtual classroom and from our state of the art training facilities around the world whilst also having the capability to deliver training on-site at your location. As a managed training service provider for large international companies or for larger qualification projects, we also provide additional services such as the analysis of qualification requirements, assessments, the development and implementation of training plans, support & administration of certification projects, curriculum development, scheduling, logistics, quality control and reporting.

Our vendor-independent consultancy services can help with a wide range of issues from conducting preliminary analyses and assessments to designing future-focused IT solutions. We have a great deal of experience in managing and implementing technology projects for partners and directly for customers. Combining our core services of training and consulting, we can also provide on-the-job training and are happy to assist customer specialists / teams on-site.
