

Microsoft Training 2016

- Cloud-Infrastructure
- Data Management and Analytics
- Enterprise Mobility
- Desktop-Solutions
- Messaging
- Unified Communications
- Collaboration
- Microsoft Certifications

As an authorized Microsoft Learning Partner, we offer only official courses from Microsoft to ensure that you are getting the highest quality training available. At Fast Lane we differentiate ourselves as a highly technical training company focusing on the core IT infrastructure that runs your business. Our Microsoft Certified Trainers (MCT) have years of practical experience and a comprehensive knowledge of Microsoft products and advanced solution deployments.

Microsoft Software Assurance Vouchers
Has your organization purchased a Microsoft software volume licensing agreement? If so, you may be eligible to redeem Microsoft Software Assurance Vouchers, which are your ticket for free Microsoft training days with Fast Lane!
For any questions regarding the Microsoft Software Assurance Training Vouchers our Customer Service team will be happy to help

Why Fast Lane

- Guaranteed Dates
- Industry-Leading Instructors
- Multi-Vendor
- Worldwide Coverage
- Full Public Schedule
- Multiple Delivery Methods
- Onsite Training
- Consulting
- Content Development

Fast Lane Enabling Digital Business

We enable our customers to execute their digital business strategies through our comprehensive portfolio of authorized training courses focused on emerging technologies and through our services such as custom content development, sales enablement, demand generation and business transformation.

Our core competency is the outsourced delivery, development, management and marketing of vendor authorized technical training on advanced technologies including Collaboration, IoT, Big Data, Security, Cloud Computing and Mobility. With one of the world's largest dedicated training lab environments coupled with the combination of physical offices in over 30 countries and partners in over 40 others, Fast Lane has a worldwide reach untouched by any other training organization.

Fast Lane Services

- Highend-Technologie Training
- Business- & Softskill-Training
- Consulting Services
- Sales & Business Enablement
- Managed Services
- E-Learning
- Remote Labs
- Content Development
- Guaranteed to Run Classes
- Onsite Training

Database

We offer training on SQL Server that will help you properly manage and access your data as it is meant to be. Learn everything you need from basic setup to advanced high-availability and disaster recovery solutions.

Database Certification Path

Cloud

Microsoft Azure is an open and flexible cloud platform that allows you to quickly build, deploy and manage applications across a global network of Microsoft-managed data centers. You can build applications using any language, tool, or framework as well as integrate your public cloud applications with your existing private IT environment. Taking our Microsoft Azure Training will allow you to shift your focus from managing and maintaining physical servers to solving business problems and addressing customer needs.

Cloud Certification Path

Collaboration

Modern collaboration tools have enabled us to work more closely together and get more done than ever. In an age when remote employees and partners are the norm for businesses of all sizes, it's easy to see why collaboration tools have become an integral part to a business's success. Collaboration enables communication, but there are many other benefits to consider: improved project management, better workflow, better management of invoicing and knowing that employees and partners have immediate access to critical business information and documents when they need it. Fast Lane offers authorized Microsoft training on collaboration tools such as SharePoint, Skype for Business, and Office 365 to help you get the most out of your collaboration solution.

Collaboration/Productivity Certification Path

Infrastructure and Virtualization

Virtualization has enabled a new generation of data centers with more efficiency, scalability and availability for your most demanding workloads. Microsoft's solutions go beyond basic virtualization capabilities, such as consolidating server hardware, to create comprehensive platforms for private and hybrid cloud that dynamically adjust to meet your business needs. This means your organization can achieve considerable cost savings and operational efficiencies. Whether you want to virtualize workloads, build a private cloud, scale your services through a public cloud, or combine all three, Fast Lane's virtualization and management training solutions for Microsoft can help you better manage resources and achieve your goals.

Server Certification Path

E-learning (On-Demand)

One of the biggest challenges our customers face in taking technical training is finding the time to do it. We understand that your time is extremely valuable and not everyone can take a week away from their busy schedules to get trained. With Microsoft's latest e-learning platform this is no longer an issue. Microsoft Official Courseware (MOC) On-Demand is a new learning platform that offers you the same official Microsoft curriculum as our classroom training but with the flexibility and convenience of e-learning. We offer Microsoft's most popular courses in this format. You will receive 24/7 access to pre-recorded instructor videos, digital courseware, online labs, and knowledge checks for a 90-day period. MOC On-Demand is also less expensive than classroom training, allowing you to get the training you need with less impact to your budget.

Microsoft Partner
On-Demand Learning

Software Assurance Training Voucher (SATV) Program

Does your company have a volume license for Microsoft software? If so, you might have free training credits available through the SATV program. We can help you redeem these vouchers for Microsoft training before your benefits expire.

Microsoft Certifications

Show your Knowledge with MCSE Certifications

Show your knowledge with a MCSE certification. Microsoft certifications cover a wide range of professional roles and attest objectively the skills of those who have achieved them.

Adopted by industry professionals worldwide, Microsoft certifications are one of the most effective tools to achieve long-term professional goals, while allowing companies to develop and retain a competent IT staff.
